CO2 (plant food) is now considered a pollutant

We are now at "our children's future" which had started in the 1970's

Dissenting climate scientists like Richard Lindzen (MIT), Fred Singer (University of Virginia), John Coleman (Weather Channel Founder) will occasionally pop up on small market cable news shows, but are NEVER allowed to come near any of America's major media outlets.

Indeed, warmists are still talking about Exxon Valdez and still lying about how the region “has never fully recovered.”

24 Ted Turner, who has donated $1 BILLION to the UN, and his Globalist crowd had planned

Just about every High School in America now has an “Environmental Science” curriculum.

"Under my plan.. electricity rates would necessarily skyrocket." Barack Obama

Prince Charles: 100 months to avert catastrophic climate change

53 "Can you cite for me the name and date of the actual physical experiment which conclusively proved that a few added parts-per-million of atmospheric CO2 will cause Antarctica to melt and flood the world's coastal cities?" then say- “I do not doubt your superior mathematical prowess, but what evidence do you have that the physics and computer modeling of GW/CC correspond to reality?”

During the mid-1990's, when RSS data revealed a very slight warming, the warmists breathlessly screamed, "Aha! Science! Science! We told you this would happen!" But after 1996, however, RSS data no longer showed that the slight warming had stopped. Since that time, mainly due to the rapid industrialization of countries such as China and India, manmade CO2 emissions have increased by at least 25%. And yet, the zero-warming trend has continued, month after month, for nearly 20 straight years now.

Antarctica is not melting away.

In other words, melting ice caps cause expanding ice caps. Who knew? Shrinking ice caps --- blame "Global Warming." Expanding ice caps --- blame "Global Warming." The sea level is rising, not lowering,

Not only is the Arctic not melting away at this time, but even if it were, there is nothing to be afraid of. The seas-levels did not rise in 1922 and the ice eventually came back.

Nearly 31,500 scientists have signed the petition that do not believe in man-made CO2-based GW/CC - 9,000 of them PhD's and many with backgrounds in atmospheric physics, climatology and meteorology. Physics legends Edward Teller (deceased) and Freeman Dyson are among the signatories of the petition

Manmade CO2 accounts for a tiny fraction of "greenhouse gases"

Many glaciers are expanding not disappearing

92 Some islands and atolls are expanding, not disappearing. Both phenomena are occurring and have always occurred and will continue to occur in the future.

Sea levels are not rising

Dr. Morner "You frighten a lot of scientists. If they say that climate is not changing, they lose their research grants."

The polar bear is threatened most gravely by global emissions of greenhouse gases; they are thriving and growing. Bears can swim for hundreds of miles at a time.

108 President George Bush the 41st and his inner circle were looking for a phony pretext to attack Iraq and weaken its ruler, Saddam Hussein. After essentially baiting Iraq to invade the tiny state of Kuwait (formerly a part of Iraq) the Bush administration falsely claimed that Iraq was preparing to invade Saudi Arabia next. To support this monstrous lie, it was announced by Bush's henchmen (and breathlessly repeated by the complicit media) that NASA had satellite imagery showing a massive formation of Iraqi troops on 109 the Iraq-Saudi border. To make a long story short: after the brief war, neither the original source for the claim nor the actual NASA satellite photos could be produced. NASA would neither confirm nor deny the original claim -- thus making the agency criminally complicit in deceiving the American people into an unnecessary war.

Climate change denial- a term used to make people seem like irrational conspiracy theorists

Example: The claim that a particular country just experienced its hottest summer in 100 years……. Why is this fallacious? On this huge planet of ours, there will always be a region that just experienced unusual warmth, and there will simultaneously be regions that are experiencing unusual cold. Cherry-picked events prove nothing.

CO2 is great for plants.

149 Both in terms of cheap energy and mass numbers of “green jobs,” wind power has failed, in spectacular fashion, to deliver what the greenies and the big investors promised. The inefficient wind-power industry is very expensive, passing its costs on to consumers and taxpayers while creating relatively few jobs.

Like wind, solar power can only survive through government coercion and only benefits the well-connected investors and solar businessmen.

Biofuels are derived from sources such as algae, vegetable oil, corn (Ethanol), waste crop material, and manure – just to name a few. Just like wind and solar, the bio-fuel scam is also inefficient, expensive, and dependent upon forced commerce and subsidies.

Coal miners in Europe and America have suffered the most – with 83,000 American coal miners losing their job as a direct result of Obongo’s EPA sanctions against CO2. (18) In states like Kentucky, West Virginia, Ohio, Illinois and Pennsylvania, hard working men with families to feed have railroaded into abject poverty, all based on a hoax.

165 "Tonight, I speak before you not as a candidate for President, but as proud citizen of the United States, and a fellow citizen of the world.” Obama

"There is urgent need of a true world political authority.. One authoritative source of oversight and coordination is the law, which lays down rules for admissible conduct in the light of the common good." Pope Francis

Russian President Vladimir Putin: "The UniPolar world refers to a world in which there is one master, one sovereign, one center of authority, one center of force, one center of decision-making. This is pernicious - At its basis there can be no moral foundations for modern civilization.”

Day after day, week after week, for about one whole year, high ranking members of the Bush gang and their allied media mouthpieces scared the public with tall tales of Saddam’s “Weapons of Mass Destruction” – aka

WMDs” In spite of Iraq’s denials and Saddam’s open invitation for unlimited inspection, the lie of WMDs was repeated over and over again. The public was told that “mushroom clouds” over the Middle East were imminent if the U.S. did not go to war with Iraq.
